Additional Notes :

This table summarizes all recorded Bybihtx conversion transactions in chronological order. Alternate row shading improves readability, while enhanced font sizes and color styling allow for clearer visual interpretation of funding flows across assets.

Small Meme [tegy.com](#) lan'na nohkhbokomohm they said "when you want to huge kiss batter"

Time	From	To	Amount
2023-10-10 10:00:00	Bybit	HTX	1000.00000000
2023-10-10 10:00:00	HTX	OKX	1000.00000000

If your question is:

"Does this look like a cybersecurity issue?"

Based on the PDF you uploaded and the transaction table inside it, yes — it could potentially be related to a cybersecurity or scam concern.

Here's why:

Signs that suggest a cybersecurity risk

1. The domain "bybihtx.com" looks suspicious

It is **not** a known exchange, not related to:

- Binance
- Bybit
- HTX
- OKX
- KuCoin

It *resembles* legitimate exchange names but is not one.

This is a common scam pattern.

2. The transaction flow looks like "conversion hopping"

Many fraudulent "investment platforms" generate fake transactions such as:

- SHIB → UXLINK
- UXLINK → FF
- FF → XCAD

...with long decimal rates to appear legitimate.

But these numbers often mean nothing — they are generated to convince users.
